EDUCATION

BSc in Optometry

University of Sri
Jayewardenepura
2024 – Present

(Entering 3rd Year,
May 2026)

TECHNICAL SKILLS

- Manual Lensometer / Focimeter
- Auto Lensometer
- Keratometer
- Slit Lamp Biomicroscope
- PD Ruler
- Trial Frame & Trial Lens Set
- Retinoscope
- Ophthalmic Dispensing Tools

KEY STRENGTHS

- Strong attention to detail in prescription verification
- High technical accuracy in lens handling and dispensing
- Patient-centered communication and education skills
- Professional and adaptable in clinical settings

PROFESSIONAL SUMMARY

Dedicated Optometry undergraduate and clinician-in-training with expertise in clinical refraction, ocular health assessment, and ophthalmic dispensing. Adept at combining patient-centered clinical skills with hands-on technical proficiency in lens verification, frame styling, and optical laboratory procedures. Seeking an opportunity to apply technical precision, patient care, and professionalism in a dynamic optical setting.

CORE COMPETENCIES

- **Clinical Skills:** Subjective & objective refraction, visual acuity assessment, binocular vision screening, slit-lamp biomicroscopy, keratometry, basic ocular health assessment, contact lens fitting support
- **Ophthalmic Dispensing:** Pupillary distance (PD) & segment height measurement, frame fitting & adjustments, Progressive Addition Lens (PAL) troubleshooting, prescription verification
- **Technical & Laboratory Skills:** Lensometer/focimeter operation, lens centration & boxing, lens glazing & fitting, frame repair & adjustments
- **Patient Care & Communication:** Clear explanation of lens materials and coatings, patient education on ocular hygiene, lens care, and maintenance

CLINICAL EXPERIENCE

Student Optometrist / Clinical Intern

University Optometry Clinic & Dispensing Laboratory |

2024 – Present

- Conducted preliminary eye exams, including visual acuity testing and basic ocular screening
- Performed subjective and objective refraction under supervision to determine prescriptions
- Neutralized and verified prescriptions using manual lensometry
- Assisted with slit-lamp examination and anterior segment assessments
- Supported contact lens fitting, including keratometry and fluorescein pattern observation
- Measured PD, segment height, and fitting heights for various lens types (single vision, bifocals, PAL)
- Educated patients on lens materials, coatings, and proper care
- Ensured strict infection control and sterilization protocols for clinical instruments

LANGUAGES

- Tamil – Fluent
- English – Professional
- Sinhala – Conversational
